

Chaitanya Medidar

Linux Foundation Mentee, CNCF - Meshery | 4x Hackathon Winner | Working on Adaptive Selective Training of LLM

✉ chaitanya.medidar@gmail.com

in linkedin.com/in/chaitanya-medidar github.com/chaitanyamedidar

Education

Vivekanand Education Society's Institute of Technology

B.E. in Artificial Intelligence & Data Science, CGPA: 8.8/10

Aug 2023 – June 2027

Mumbai, India

Skills

Languages: Python, Golang, TypeScript, JavaScript, Java

Web: React, Next.js, Node.js, FastAPI, REST APIs, RTK Query

AI/ML: PyTorch, TensorFlow, Scikit-Learn, HuggingFace TRL, LoRA/QLoRA, Ollama

Cloud & DevOps: Linux, Kubernetes, Docker, GitHub, GitHub Actions, CI/CD, Google Cloud Platform

Databases & Testing: SQL, SQLite, Unit Testing, Debugging

Experience

Linux Foundation Mentee

Jun 2026 – Aug 2026

Cloud Native Computing Foundation, CNCF Meshery

Remote

- Unified three connection entry points into a shared Create Connection wizard in React and TypeScript.
- Fixed a query serialization bug that emptied Prometheus, Grafana, and Kubernetes views, adding Vitest tests.
- Deduplicated MeshSync events in the Go server via atomic CompareAndSwap and preserved credential IDs on save.
- Resolved an RJSF password-field crash and invalid timestamps, and rebuilt the Kubernetes context switcher.

Open Source Contributor

Dec 2025 – Present

Microsoft VS Code, Falling Fruit, AnkiDroid, Hiero Ledger, Meshery

Remote

- Contribute merged fixes across large open source projects, including Microsoft VS Code UI and settings improvements, Falling Fruit frontend UX fixes, and AnkiDroid validation with unit test coverage.
- Improve infrastructure and maintainer workflows across Hiero Ledger and Meshery by adding CI and workflow automation, adapter-related tests, documentation fixes, and security hardening for workflow and auth handling.

Projects

STAR: Fine-Grained Token Selection for Efficient Coding Agents | *PyTorch, TRL, SWE-bench* *Ongoing*

- Designing a three-phase selective SFT pipeline extending Rho-1 to coding agents, prioritizing error-recovery tokens.
- Traced a null pilot result to a threshold bug dropping 80.6% of 167K recovery tokens, fixed with a force-keep path.
- Froze a five-type failure taxonomy from 750 SWE-Lego trajectories, gating detection at 0.80 per-type precision.

NaviSense, Offline Visual Assistance App | *Flutter, YOLOv8n TFLite, ML Kit, Firebase*

Mar 2026

- Won Hack4Innovation 2026 among 1,500+ participants with an offline-first app for visually impaired users.
- Deployed on-device YOLOv8n hazard detection for 15 classes and ML Kit OCR for 15+ Indian scripts.

Vulnerability Detection via QLoRA Fine-Tuning | *Python, QLoRA, Ollama, HuggingFace TRL*

May 2026

- Fine-tuned Qwen2.5-Coder-1.5B-Instruct via 4-bit QLoRA on 4 CVE/CWE datasets, 80 to 81% token accuracy.
- Shipped an 80 MB offline Ollama model that flags OWASP flaws and patches Python and Node.js APIs.

AI Mock Interview Platform | *Next.js, FastAPI, Gemini 2.5 Flash, VAPI*

Nov 2025

- Built voice behavioral and live coding interview rounds with real-time LLM feedback through VAPI and Gemini.
- Implemented a SQLite-backed FastAPI service serving 50+ questions, with a Monaco editor for code assessment.

Certifications

Google Cloud: The Basics of Google Cloud Compute, Set Up a Google Cloud Network, Monitoring in Google Cloud

AWS Academy: Cloud Foundations **Microsoft Certified:** Azure AI Fundamentals

NVIDIA: Fundamentals of Deep Learning

Achievements

- **Hackathons:** 1st Place at Hackquinox 2.0, Hack4Innovation 2026, GDG VESIT TechSprint, and Ideathon 2025, with a 71% finalist rate. Top 125 of 800+ at Cardano Asia IBW 2025.
- **Public Speaking:** 3rd Place, Kewalramani Public Speaking, Jai Hind College
- **Leadership:** Head of Design, VESLit Circle, VESIT | Tech Officer at MBFTL, VESIT
